1. Nature of operations

Cipher Pharmaceuticals Inc. ["Cipher"] and its subsidiaries [together the "Company"] is a specialty pharmaceutical company with a diversified portfolio of commercial and early to late-stage products. The Company acquires products that fulfill unmet medical needs, manages the required clinical development and regulatory approval process, and markets those products either directly in Canada or indirectly through partners in the United States ["U.S."], Canada and Latin America. The Company is building its business through product licensing and acquisitions. Cipher was incorporated under the *Business Corporations Act* (Ontario) on January 9, 2004 and is located at 209 Oak Park Blvd., Suite 501, Oakville, Ontario.

2. Basis of preparation

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting*. The disclosures contained in these condensed interim consolidated financial statements do not include all of the requirements of International Financial Reporting Standards ["IFRS"] as issued by the International Accounting Standards Board for annual financial statements. The condensed interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2020, which have been prepared in accordance with IFRS, and are available on SEDAR at www.sedar.com. The condensed interim consolidated financial statements are based on accounting policies as described in the 2020 annual consolidated financial statements, except for the adoptions of new standards effective as of January 1, 2021.

The condensed interim consolidated financial statements include the accounts of the Company and its wholly owned legal subsidiaries: Cipher US Holdings Inc., Cipher US Holdco LLC and Cipher Pharmaceuticals US LLC. On February 1, 2020, Cardiome Pharma Corp was amalgamated with Cipher. All significant inter-company balances and transactions have been eliminated upon consolidation.

The Board of Directors approved these condensed interim consolidated financial statements on May 13, 2021.

The Company is closely monitoring the developments of the coronavirus disease ["COVID-19"] situation. The global response to the COVID-19 outbreak has resulted in, among other things, border closures, severe travel restrictions and extreme fluctuations in financial and commodity markets. Additional measures may be implemented by one or more governments in jurisdictions where the Company operates. Labour shortages due to illness, Company or government-imposed isolation programs, or restrictions on the movement of personnel or possible supply chain disruptions could result in a reduction or cessation of all or a portion of the Company's operations. The extent to which COVID-19 and any other pandemic or public health crisis impacts the Company's business, affairs, operations, financial condition, liquidity, availability of credit and results of operations will depend on future developments that are highly uncertain and cannot be predicted with any meaningful precision, including new information which may emerge concerning the severity of COVID-19 and the actions required to contain COVID-19 or remedy its impact, among others.

The actual and threatened spread of COVID-19 globally could also have a material adverse effect on the regional economies in which the Company operates, could negatively impact stock markets, including any future trading price of the Company's shares, could adversely impact the Company's ability to raise capital, could cause continued interest rate volatility and movements that could make obtaining financing or renegotiating the terms of the Company's existing financing more challenging or more expensive.

Any of these developments, and others, could have a material adverse effect on the Company's business and results of operations. In addition, because of the severity and global nature of the COVID-19 pandemic, it is reasonably possible that the estimates in the financial statements will change in the near term and the effect of the

[in thousands of United States dollars, except per share amounts - unaudited]

change will be material. Potential impacts may include, but are not limited to, impairment of long-lived assets and a change in the estimated credit loss on accounts receivable.

Fair value of financial instruments

Fair value is defined as the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is quoted bid or ask prices in an active market. Quoted prices are not always available for over-the-counter transactions, as well as transactions in inactive or illiquid markets. In these instances, pricing models, normally with observable market-based inputs, are used to estimate fair value. Financial instruments traded in a less active market have been valued using indicative market prices, present value or other valuation techniques. Where financial instruments trade in inactive markets or when using models where observable parameters do not exist, greater management judgment is required for valuation purposes. In addition, the calculation of estimated fair value is based on market conditions at a specific point in time and, therefore, may not be reflective of future fair values.

As at March 31, 2021, the Company's financial instruments consisted of cash, accounts receivable, accounts payable and accrued liabilities, and a derivative financial instrument. The derivative financial instrument is measured at fair value with any changes recognized through the condensed interim consolidated statements of income and comprehensive income and is classified as Level 2 [as defined under IFRS]. Cash, accounts receivable, accounts payable and accrued liabilities are measured at amortized cost and their fair values approximate carrying values.
